

# Science Clips

*Science Clips* is a collaboration between the CDC Public Health Library and Information Center (PHLIC) and CDC's Office of the Associate Director for Science(OADS).

## What is *Science Clips*?

scienceclips  
CDC

CDC *Science Clips* is an online bibliographic digest featuring **scientific articles and publications** that are shared with the public health community each week, to enhance awareness of emerging scientific knowledge.

The weekly digest consists of four components:

- **Top ten articles of the week** - Selected weekly by a senior CDC scientist from the standard sections listed below.
- **CDC-authored publications** - Articles published in the past 6-8 weeks authored by CDC or ATSDR staff.
- **Key scientific articles in featured topic areas** - Subject matter experts decide what topic to feature, and articles are selected from the last 3 to 6 months of published literature. Key topic coincides monthly with other CDC products (e.g. Vital Signs).
- **Public health articles noted in the media** - Articles about important public health topics that have been mentioned in the press.

## How can I use *Science Clips*?

Recent articles and publications are provided in a **"one-stop-shop" format**, providing quick access to key scientific findings.

CDC *Science Clips* can be **browsed by topics**, enabling rapid searching of key scientific findings.

*Science Clips* is in the **public domain** and may be freely forwarded to other colleagues and reproduced without permission. The original sources and the *CDC Science Clips* should be cited as sources.
